farvision erp

2026
CONSTRUCTION-GRADE ERP
SINCE 1996

CORPORATE BROCHURE · INDIA EDITION · 2026

THE PLATFORM · INDIA · SOUTH ASIA · GCC

The ERP *construction* actually runs on.

The construction-grade ERP **built ground-up for builders, contractors, leasing operators, community managers, FM teams and construction manufacturers** — the six industries inside the construction value chain. Same platform. Same database. Six businesses run on it.

WHY TWO PLATFORMS CAN'T RUN CONSTRUCTION

One platform that learns.
Or two that argue.

Construction doesn't fit cleanly into a finance tool plus a sales tool, with an integrator stitching them together. Land bank, BOQ, slab milestones, demand letters, channel-partner attribution, RERA, escrow, customer apps — these don't fail inside the modules. **They fail in the gap between them.** And the gap doesn't shrink over time. It compounds — into reconciliation cycles, audit risk, and the cost of three vendors pointing at each other.

▸ THE FARVISION ANSWER

One platform that *learns from 900+ construction firms* — and brings that compounding domain knowledge back to your business, *300–400 real-estate-specific advances every year.*

01

One database. Six businesses.

Real estate, contracting, leasing, FM, community ops, manufacturing — **same platform**, same audit trail, same reconciled numbers. No middleware. No nightly batches.

02

Compounding domain knowledge.

Every RERA wrinkle, every escrow rule, every cancellation pattern — **absorbed once, available to all 900+ firms** running on Farvision. 300–400 construction-specific advances every year.

03

Agentic AI · trained on the domain.

Not a generic chatbot bolted on. Doc-scan posts invoices to GL. Demand letters auto-draft on milestones. **Acts on the system, learns the domain, compounds with every customer.**

04

The integration is the audit risk.

Brokerage attribution, RERA filings, 26QB, cancellations — these don't fail in the modules. **They fail between them.** One platform, one audit trail, no integrator in the middle.

THE TWO-PLATFORM PATH

Generic finance + sales tool, stitched together

- Generic finance for the books · sales tool for the pipeline · integrator in the middle
- Brokerage in sales tool · paid from finance · reconciled in Excel
- RERA · escrow · cancellations break across two databases
- Generic AI · broad knowledge · zero construction depth
- 18–24 month implementation · three vendors accountable

THE ONE-PLATFORM PATH · FARVISION

Construction-native · 900+ firms compounding back

- One database · finance, engineering, sales, materials, HR — all reconciled
- Brokerage attributed at lead, auto-released on collection · in one ledger
- RERA · escrow · 26QB · GST · TDS · all built-in
- Agentic AI trained on real estate — acts, compounds, gets sharper every year
- 300–400 construction-specific advances every year

▸ **The proof —** *some of our customers tried the two-platform path. They came back. The reason was always architecture and learning curve, not feature parity.*

SIX INDUSTRIES · ONE PLATFORM

The platform for *builders, contractors,* leasing operators, community managers, FM teams, manufacturers.

Farvision is **built ground-up for the six industries inside the construction value chain** — each with its own version of finance, materials, sales and operations. Common modules underneath, vertical-specific workflows on top.

BUILD & SELL 01

Real Estate Developers

Land bank to handover. Liaison, legal, sales, customer care, finance, engineering — connected end-to-end for builders running residential and commercial projects.

FINANCIALS · CRM · MATERIALS · ENGINEERING · BD · RERA

BUILD FOR OTHERS 02

Contractors

Tender to client bill, with sub-contractor billing, equipment maintenance and progressive payment certification — all auditable, GST and TDS pre-handled.

TENDERING · CLIENT BILLING · SUB-CONTRACTOR · EQUIPMENT · MATERIALS

OPERATE · OWN 03

Leasing Management

From abstract lease to active income — book it, bill it, bank it. For commercial & residential portfolios — towers, malls, IT parks, mixed-use.

LEASE MGMT · TENANT PORTAL · FINANCIALS · CAM · EJARI

OPERATE · COMMUNITIES 04

Community Managers

Society / community operations — billing, maintenance, complaints, visitors, polls, society books and audit. Resident app. Builder handover-to-society.

COMMUNITY MGMT · RESIDENT APP · VISITOR MGMT · FINANCIALS

OPERATE · FACILITIES 05

Facility Managers (CAFM)

Computer-aided facility management — work orders, PPM, asset register, technician mobile app, energy & HSE compliance. 14,000+ assets across 120+ customers.

CAFM · TECHNICIAN APP · PPM · ASSET REGISTER

MAKE 06

Manufacturing for Construction

Pre-fab elements, batching plants, wet & dry mix, aggregate crushers — the backward-integrated piece of the value chain. Same ERP that runs your projects.

PRODUCTION · BATCH & QC · DISPATCH · PLANT MGMT

▸ UNDERNEATH ALL SIX

7 common modules. Financials · Business Development · Engineering · Materials & P2P · CRM · Property Management · Employee Life Cycle. Plus 10 mobile apps and 5 web portals serving every stakeholder. One platform, six businesses, always reconciled.

THE NUMBERS BEHIND THE PLATFORM

28 years. Six industries.
The numbers do the talking.

The credentials that matter

- **NSDL Suvidha provider since July 2017** · Direct e-filing for GST returns. Direct, not via aggregators.
- **India · South Asia · GCC presence** · India HQ since 1996, Dubai office since 2017. Customers across India, Bangladesh, Sri Lanka, UAE, KSA, Qatar, Bahrain, Oman.
- **4-day FY close · 269 reports built-in** · Audit-grade out of the box.
- **Median customer tenure: 5+ years** · The first Farvision customers from the late 90s are still running on us.

TECH · 01
Agentic AI · domain-trained
Acts, doesn't just answer. Trained on real estate. Compounds with every customer.

TECH · 02
Power BI dashboards
Built on a dedicated data warehouse. Standard exec views, drill-through to GL.

TECH · 03
Mobile-first
10 mobile apps · 5 web portals · iOS & Android · live to HQ.

TECH · 04
Cloud-native
Hosted, managed, scaled · with APIs to whatever else you run.
